

PUREZZA™

PREMIUM WATER

EXL700

Unrivalled high capacity undercounter unit for the HORECA sector

*Purezza Tap Required with undercounter systems

High capacity undercounter system

The EXL700 has unrivalled dispense capabilities, it efficiently caters for very high demand requirements for cold and sparkling water. The EXL700 is ideal for busy environments where fast dispensing and filling of multiple bottles is required. The EXL700 pairs elegantly with our Purezza taps to provide filtered chilled still and sparkling water time after time.

Leading technology

The EXL700 features two core technologies:

Performance filtration

Professional grade filters are used to improve taste and reduce odours resulting in great-tasting, crystal-clear water.

Ice Bank cooling system

Ice Bank cooling technology is a necessity in busy HORECA environments where large quantities of consistently ice-cold water are required.

Professional water dispensing for commercial environments

EXL700 is the recommended undercounter solution for HORECA environments such as bars, restaurants, cafeterias and conference centres.

Features

- High capacity undercounter unit paired with elegant bar taps
- Two water dispensing options – cold, and sparkling
- Tap surfaces designed in stainless steel to facilitate easy cleaning
- Practical mechanical taps allow two bottles to be filled at the same time
- Recessed drip tray or tap clamp drip tray options available
- Purezza ‘still’ and ‘sparkling’ tap decals to promote Purezza within your venue
- Tap flow rate adjustment to suit your dispensing needs (Cobra 2 tap only)
